In Korean Hangul

TRAN KARABATSOS

From the Author

To benefit from this book, the reader should first learn the Korean Alphabet Hangeul. It is not as scary as it sounds and is quite easy to learn. It's phonetic! Meaning it is very similar to the English system where you can sound words out.

Most can memorise the alphabet within one week of learning, some can even learn it overnight. So as to begin your Korean learning journey it is recommended to take your time memorise and master the Korean Hangeul Alphabet. From there building your vocabulary would be much easier and fun. It is just a matter of time and you will know hundreds of Korean words and also be able to read in Korean!

Go for it! I know you can do it.

Thanks,

Tran Karabatsos
